SKILLS

- Python (NumPy, Pandas,...)
- SQL
- Power BI
- Microsoft Fabric
- Time Management
- Data Analysis
- Critical Thinking
- Attention to Detail

LANGUAGES

- English (Fluent)
- Uzbek (Fluent)

ACHIVEMENTS

•SAT: 1350 (first attempt)
•IELTS: Overall band 7.0

PROFILE

Third-year AI and Robotics student at New Uzbekistan University on a full merit scholarship, with professional experience in data engineering using Microsoft Fabric and SQL. Builds pipelines, transforms and models data, and delivers reporting in Power BI. Also skilled in Python (Pandas, NumPy) for data analysis.

WORK EXPERIENCE

Data Engineer | MAAB | Tashkent |

- Contributed to building MAAB's learning platform as a data engineer, developing its data layer in Microsoft Fabric.
- Built and maintained data pipelines in Fabric, ingesting, transforming and modelling data with SQL.
- Developed interactive Power BI dashboards and reports to track key platform metrics and support decision-making.
- Served as backup data engineer for 2 years, keeping pipelines and reports running reliably and resolving data issues.

SAT Teacher | [Bagat specialized school], Bagat

- Taught SAT preparation to high school students, covering [Math / Reading & Writing].
- Prepared lessons and practice tests, and tracked student progress to target weak areas.
-

EDUCATION

New Uzbekistan University (08/24 - present)
Tashkent

Bachelor of Science in Artificial Intelligence and Robotics

School of computing| New Uzbekistan University

GPA: 3.2 / 4.0

Bachelor's Degree in AI and Robotics (ongoing) Awarded a 100% merit-based scholarship for academic excellence. Relevant coursework includes data analytics, database and network design, and programming. Strong academic background with a high school GPA of 5.0.
