PROFILE

Motivated AI and Robotics undergraduate pursuing a bachelor's degree under a 100% merit based scholarship. Proficient in Python (NumPy, Pandas, Matplotlib), SQL, Microsoft Fabric, and Power BI, with a strong interest in data analytics and AI-driven solutions. Adaptable, detail oriented, and eager to apply technical skills in real-world projects.

WORK EXPERIENCE

Personal / Academic Project (09/24 - PRESENT)

- Analyzed and processed structured datasets using Python (NumPy, Pandas) to extract insights and trends.
- Built interactive dashboards and reports using Power BI to visualize key metrics and support data-driven decisions.
- Worked with Microsoft Fabric to manage, transform, and model data efficiently for analytics workflows.

EDUCATION

New Uzbekistan University (08/24 - present)
Tashkent

Bachelor of Science in Artificial Intelligence and Robotics
School of computing| New Uzbekistan University
GPA: 3.2 / 4.0

Bachelor's Degree in AI and Robotics (ongoing)
Awarded a 100% merit-based scholarship for academic excellence. Relevant coursework includes data analytics, database and network design, and programming. Strong academic background with a high school GPA of 5.0.
